REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art, either alone or in combination, does not disclose or render obvious the submedia are distributed in the main medium such that the submedia form minute regions each of which exists locally in the cross section perpendicular to the direction of the light travelling in the optical waveguide without extending along the axis of the optical waveguide; the refractive-index profile being formed based on at least one of: (c) the numerical distribution density of the minute regions; and (d) the individual size of the minute regions; wherein the submedia are made of gas in combination with the rest of claim 1 for the reasons stated by Applicant in the Remarks section filed 9/29/05.

It is noted that the claim 1 is allowable because the unique combination of each and every specific element stated in the claim.

The prior art, either alone or in combination, does not disclose or render obvious a method wherein the submedia are made of gas...and are distributed in the main medium such that the submedia form minute regions each of which exists locally in the cross section perpendicular to the direction of the light travelling in the optical waveguide without extending along the axis of the optical waveguide; and (b) a second step for providing the intermediate with the refractive-index profile for transmitting light the refractive-index profile being formed based on at least one of: (c) the numerical distribution density of the minute regions; and (d) the individual size of the minute

regions in combination with the rest of claim 6 for the reasons stated by Applicant in the Remarks section filed 9/29/05.

It is noted that the claim 6 is allowable because the unique combination of each and every specific element stated in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Broeng et al. (6539155), DiGiovanni et al. (5802236), Elrefaie et al. (6614974), and Broeng et al. (6539155) are representative of the prior art. Each of these prior art documents at least lacks the limitation "without extending along the axis of the optical waveguide" since all of these said documents do in fact have minute regions extending along the optical axis of the waveguide.
